

# PO8X Touch POS Series

## Dual Monitors Fanless PC POS

### MODEL EXPLICATION

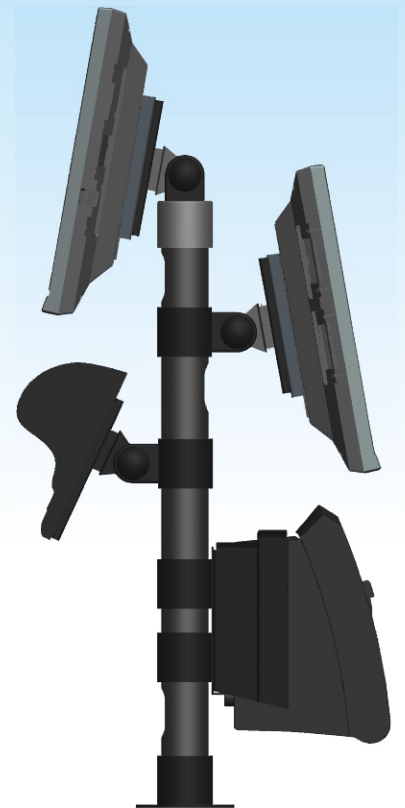

#### PO8XX1SK

- 1: basic type
- 2: extendable type

- null: keyboard without password
- K: keyboard with password
- null: without scanner
- S: N3030 omnidirectional scanner
- null: without printer
- 1: PP7 serial port with cutter

#### Display

- 1: operator display 12" touch-control  
customer display 12" LCD
- 2: operator display 12" touch-control
- 3: operator display 15" touch-control  
customer display 15" LCD
- 4: operator display 15" touch-control

**PO8X is a touch screen POS, which integrates dual monitors, one printer and one omnidirectional scanner. It is able to work with up-open-style drawer that is embedded in the counter, which makes it more convenient for cashier to operate.**

### Unique Function

- ✦ The infrared non-pressure touch screen is with high-brightness, and is much brighter than the resistance screen. In addition, it won't be scratched.
- ✦ The RF wireless ID identification login lock (optional) is very convenient.
- ✦ Optional cards readers for magnetic card, RFID card, and Smart Card.
- ✦ Fanless host computer directly inbuilt in the touch screen, combined with wireless technology, expansion of POS peripheral devices is convenient.

## Advanced functions and characteristic

- ✦ Host computer adopts professional fanless mainboard and low-power-consumption CPU, which makes computer run more stable and reliable.
- ✦ The pole mechanism makes it flexible and easy to fix two screens.
- ✦ Sophisticated arm mechanism design, easy assembly of POS peripherals, like receipt printer.
- ✦ The omnidirectional scan platform is 45° degrees downward, which make the cashier operate scanning conveniently.
- ✦ Able to connect with embedded scanning scale (optional) which is inbuilt in the counter, greatly save the space.
- ✦ The up-open-style drawer (optional) makes it easier and more convenient to operate.

## Other characteristic

- ✦ High anti-interference design (4000V).
- ✦ The operator display can be rotated from 25°~ 60° according to the cashier's habit.
- ✦ Modulized design which is able to easily install and uninstall card reader for Magnetic card, RFID card, smart card (IC card), and the keyboard.

## Specifications
