A One-shop Commercial Device Provider

Model Explication

SO1X

- W4: 433 wireless
- Self Order Terminal

【Dimension】

【Advanced functions and characteristics】

- ※ Universal application: Pinnacle's OED self-order terminal (SO1X) adopts 433 wireless and long-distance communication technology, easy to install, avoiding the troublesome wirings. Suitable for public places for entertainment such as restaurant, coffee house and KTV, etc.
- ※ Convenient to customers: after customers open a table or plate, they can press the dishes no. in SO1X directly, to order dishes, which will be transmitted to foreground wirelessly, no need of waiting for waiters recording, thus realize no-wait ordering.
- ※ Save manpower: After guiding customers to take seats, waiters only need to inform customers can order by themselves by SO1X, no need of waiting. Save manpower, and at the same time improve the efficiency.
- ※ Enhance reputation: Excellent service enhances the reputation of the entertainment places, attracting customers to visit again.
- ※ With service caller function (water, check out, caking an order, service call), able to avoid calling loudly on the table with large acreage or blind corner.
