

Vertical Adjustable Cash Drawer

Patented product, Unauthorized usage prohibited
Cash drawer Patent No.: ZL 03 2 20560.0

Model Explication

Functions and characteristic

- ◆ Large note capacity (adjustable compartment, vertical note insert).
- ◆ The size of the note compartments can be adjusted variably to adapt them to different note sizes and quantity, avoiding shift ahead of schedule due to the limited note space.
- ◆ Notes are stored vertically in the cash drawer, which is very easy for giving change.
- ◆ Drawer front is equipped with one media slot for cheques, credit card receipts, coupons and other media in case drawer locked.
- ◆ 3-function unlocking types including key open (optional), manual open, and host-computer control open.
- ◆ Optional drawer core with metal cover can be taken out to settle accounts in back office, avoiding counting locally and pausing cash collect.
- ◆ With upper cable collecting hole to make the POS cable centralized and beautified. Bottom cable slot enables all cables trim.
- ◆ The spring-arm mechanical structure (the traditional style is spring mechanism) ensures the opening force average and closing force small, making the operator easy to close the drawer.

The till with metal-cover (optional) can be taken out to settle accounts in the back office.

Technical Specification

- ◆ Loop spec: $6\ \Omega \sim 9\ \Omega$, 12V~24V, 100ms pulse (discharged by 2200 μ F capacity)
- ◆ Optional CW2XR with parallel connection RS-232port for PC POS (Windows and Dos system) user, which doesn't occupy one COM port, gets electricity from keyboard and can be assembled without opening PC case.
- ◆ Optional connector RJ11 (crystal port) cable for EPSON printer (CW2XE) and STAR printer (CW2XS).
- ◆ Optional status switch (SW2XXXS).
